FCC MAIL ROOM

Dear Sir,

This is my formal comment on MM Docket 99-25. I enthusiastically endorse the approval of the proposal for low power FM stations including 1000, 100, and 10 watt strengths. There is a dire need for original musical programming that is not being done by commercial stations.

My former college-Haverford- would be a perfect example of a place that currently needs to broadcast in a small radius. I, myself, am interested in broadcasting worthy music that is virtually unheard on the local scene.

As long as it is technically possible, please do it! Also please ensure that any resulting licenses are not snapped up by commercial companies or their employees.
